

TrustPort

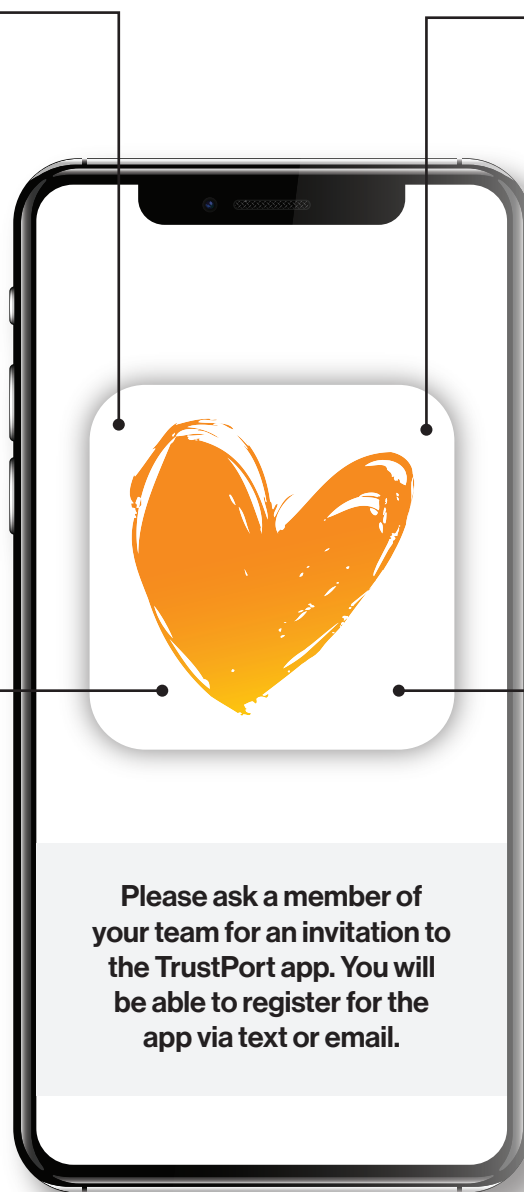

The new way to communicate. A single, digital solution that delivers care team collaboration and communication for patients.

Receive Important Information: You may receive timely and effective communications from your team when there are new instructions regarding your medical care or in the event of a potential weather-related delay.

Sign Documents: You may be required to sign a document before a medication can be delivered. You can do that from the app and at your convenience.

Chat with your Care Team: Communicate changes made by your physician, new medications you were started on or changes related to the treatment we are providing; ask general questions about delivery dates or concerns you may have; or even send pictures or attach a document from within a chat.

Complete Forms: Your care providers may send you forms to complete. You can do that from the app and at your convenience.

All communication within the app, including forms, documents, chat messages and images, are 100% **HIPAA-secure and confidential**. Everything you send is routed to the person most able to assist you with your needs, in the quickest way possible. **Register today and let's communicate!**

Please reach out to us at 888-441-4040 with any questions.
